#### We collect millions of data points each month ...

# ... and turn it into actionable intelligence.

#### **Automated collection & augmentation**

We write proprietary software that gathers data from public sources including news, filings, social networks, job boards, and third party data providers. Al is used to augment data. Algorithms are used to add predictive intelligence

#### Human-led research

Adding a quality layer by doing research, often as part of reports for clients or marketing, and often working directly with field experts (founders, investors, and others).

#### **Community-led input**

Governments share data with us. Data is also submitted to us by startups, angels, VC, accelerators, universities, regional development banks (so that they are more visible and ranked).

#### **3M+ organisations**

Funding rounds, investors, teams, valuations, job openings, tech stack, headcount, revenues, descriptions, predictive analytics

## Hundreds of market segments

Verticals, (sub-)verticals, technologies, business models, niche segments, industry maps, emerging technology

ıD

#### **Real time analytics**

Investment by stage, startup birth, failure, graduation rates, exits, unicorns and more
